

Proteins

Harris's rule, applied to every row in this section. Regardless of the time given, doneness on poultry and pork is verified, never assumed. The step must instruct: check core temperature with a thermometer, or cut into the thickest part - the flesh should be opaque and white throughout with clear juices, no pink flesh and no pink or red juice.

The validator treats a missing verification instruction on a poultry or pork step as a flag, independently of whether the stated time looks reasonable.

Protein	Reference cut	Pan	Roast 200C	Simmer	Band	Verify by	Correction
Chicken breast	whole, 2.5cm	14	20	15	B4	Yes	✓
Chicken breast	2cm strips	7	-	8	B3	Yes	✓
Chicken breast	2cm dice	8	18	9	B3	Yes	✓
Chicken thigh, boneless	whole	16	30	25	B5	Yes	✓
Chicken thigh	2cm dice	10	22	15	B4	Yes	✓
Chicken, bone-in	whole pieces	-	40	35	B6	Yes	✓
Turkey breast	2cm dice	8	18	9	B3	Yes	✓
Pork loin	2cm medallion	8	20	-	B3	Yes	✓
Pork, diced	2cm dice	10	22	45	B4	Yes	✓
Pork mince	loose	8	-	-	B3	Yes	✓
Sausage	whole	12	25	-	B4	Yes	✓
Beef mince	loose	8	-	-	B3	Colour through	✓
Beef steak	2cm, med-rare	6	-	-	B3	Surface sear	✓
Beef, stewing	3cm dice	sear 8	-	120	B6	Tenderness	✓
Lamb, diced	2cm dice	8	22	90	B3 / B6	Surface sear	✓
White fish fillet	2cm thick	7	12	8	B3	Flakes, opaque	✓
Salmon fillet	2.5cm thick	8	14	-	B3	Opaque at edge	✓
Prawns, raw	peeled	3	-	3	B2	Opaque, curled	✓
Egg, scrambled	beaten	3	-	-	B2	Set	✓
Halloumi	1cm slice	4	-	-	B2	Colour	✓
Tofu, firm	2cm cube	8	20	-	B3	Colour	✓

Point requiring your explicit confirmation. Whole-muscle beef and lamb are surface-pathogen cases, so a sear addresses them and interior doneness is a preference rather than a safety matter. Minced and comminuted meat is not, because surface becomes interior. This is the reasoning that makes rare steak acceptable and rare burger not. Confirm, correct, or replace it in your own words.

Starches and grains

Item	Reference	Time	Band	Correction
Dried pasta	-	9	B3	package instructions + trying
Fresh pasta	-	3	B2	✓
White rice	absorption	18	B5	package instructions or experience
Risotto rice	stirred	20	B5	16-20 min.
Brown rice	absorption	35	B6	always try / don't trust time

Item	Reference	Time	Band	Correction
Couscous	steeped	5	B2	✓
Bulgur	absorption	12	B4	✓
Red lentils	simmer	18	B5	even faster
Green, Puy lentils	simmer	30	B6	✓
Quinoa	absorption	15	B4	✓
Gnocchi, fresh	boil	3	B2	✓

How the validator uses this

1. Read each step's `ingredients_added` and the cut declared for each ingredient.
2. Resolve every ingredient to a band via the table, the class default, and size scaling.
3. Within a single step, compare bands. More than one band apart is a flag.
4. Compare each ingredient's band against the step's stated duration. Materially longer is a flag.
5. Any poultry or pork step without a verification instruction is a flag, regardless of time.
6. On flag, inject a correction and regenerate rather than blocking the user.

Review checklist

Tick each item once you have actually done it, then sign at the bottom.

	Item	Notes
☒	Corrected any time that is wrong. These were drafts.	☒
☒	Confirmed or replaced the four size-scaling multipliers.	
☒	Confirmed the one-band tolerance is the right compatibility rule.	
☒	Confirmed the whole-muscle versus minced distinction in the proteins section.	
☒	Confirmed the exact wording of the doneness verification instruction.	
☒	Added any ingredient common in Swiss home kitchens that is missing.	
☒	Confirmed the band definitions match how the app should actually behave.
